ONE BRAND SOLUTION

Simplifying people's lives, simplifying the work of its partners: this is the spirit behind Ekinex's offering. A single point of contact that responds to market needs with integrated, efficient and reliable solutions.

Wall-mounted devices FF

The FF series combines Ekinex's original design with advanced functionality. KNX push-buttons with 2 or 8 rockers, customisable with text and icons, equipped with red and white LEDs, manage lighting, air conditioning and blinds, also integrating the thermostat function. Made of metal, Fenix NTM® and technopolymer, available in Form or 'NF versions, the FF series offers elegant and versatile solutions for any environment.

Wall-mounted devices SIGNUM

Signum introduces touchscreen control on an Ekinex KNX push-button. It manages lighting, climate, relative humidity control and multimedia, even with dedicated screens. Available in Deep or Surface versions, Bluetooth configuration allows users to tailor the experience to their needs.

Wall-mounted devices 20VENTI

The 20venti series combines modern design with advanced functionality. KNX push-buttons with integrated proximity sensor, with 4, 5, 8 or 10 RGB backlit rockers, manage lighting, air conditioning, shading and thermostat function. Made of metal, Fenix NTM® and technopolymer, available in Deep or Surface versions, complete with single or double sockets, it offers elegant and versatile solutions.

Wall-mounted devices 71

The 71 Series combines elegant design and advanced functionality. KNX push-buttons with 1 to 8 rockers, equipped with red and white LEDs, manage lighting, blinds and air conditioning, also integrating the thermostat function. Made of metal, Fenix NTM® and technopolymer, available in Deep, Surface, Form and 'NF versions, with single, double or triple configurations, it offers versatile and refined solutions.

Wall-mounted devices PROXIMA

Proxima combines elegance and versatility in a contemporary design. KNX push-buttons with 1, 2 or 4 rockers, equipped with RGB LEDs, manage lighting, air conditioning, shading and thermostat functions. The laser engraving on the plate and the high-quality finishes enhance the metal design of the magnetic plates, while sockets and civil series modules, also in double configurations, make Proxima a complete and flexible solution.

Wall-mounted devices ERA

ERA was designed by Michael Vincent UY, combining functionality and precision. KNX push-buttons with 1, 2 or 4 rockers that can be customised with text and icons, equipped with RGB LEDs, manage lighting, air conditioning, shading and thermostat functions, even with a humidity sensor. ERA's refined finishes add depth and three-dimensionality, enhancing its metal construction.

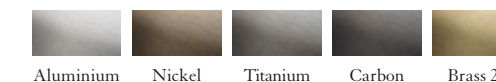

Wall-mounted devices MATERIALS AND FINISHES

In selecting materials and finishes, we strive for the highest quality to achieve an excellent end result that enhances the product's design and ensures its durability. Special textural effects and harmonious tactile characteristics complete the look of the decoration, perfecting the overall design.

DELÉGO VISUALISATION

Thanks to Delégo, you can stay connected to your home at all times, from anywhere, at any time of day. Delégo controls every room, ensuring your safety, well-being and comfort. It creates the most suitable scenario for every moment of the day, leaving you free to enjoy every moment. Delégo allows you to remotely control lights, climate, automation, audio/video

devices, shutters and more with a simple touch, from a single device and from anywhere in the building reached by Wi-Fi or remotely via a web connection. Immediate integration with Ekinex devices is enhanced by compatibility with any device based on the open KNX standard.

DICO IP VIDEO DOOR PHONE

With an elegant design and extreme ease of use, the Dico IP video door phone utilises a wide range of cutting-edge technologies for intelligent access to buildings and home control.

SENTIO MULTIROOM AUDIO

Listen to your favourite music in any room of your home. Sentio brings the magic of sound to every room, transforming your listening experience into emotion.

REVÉLO LIFT TV

We love watching our favourite series, sporting events and the news as soon as we wake up, but we only want to watch TV when we need to. We have created Made in Italy lifts to optimise your space and hide your TV when it is not in use.

DIN-RAIL MOUNT MODULES

We offer a wide range of DIN rail modules based on KNX and DALI standards, which allow for the automated and decentralised management of technological systems of all types and sizes.
